

Town of Greenville

TOWN BOARD MEETING

TENTATIVE AGENDA

February 15, 2016

7:00 pm Bill Paying, with Regular monthly meeting to follow

Approval of minutes: 1/18/16

OLD BUSINESS

- a) Highway
- b) Buildings and Grounds
- c) Code Enforcement
- d) Sewer
- e) Water
- f) Recycling
- g) Assessor
- h) Planning Board
- i) Dog Control Officer
- j) Beautification Committee

NEW BUSINESS

- a) Victor Cornelius ~ Discuss 2016 Grant Applications
- b) Columbia Greene Humane Society Contract
- c) 2016 Roller Skating Program
- d) Teamster's Contract Ratification
- e) Changes to Zoning Law, Solar Energy. Set Public Hearing
- f) Misc

Open Meeting

Supervisors Report

Upcoming scheduled Town Board meetings:

March 21, 2016 at 7:00 pm

Public Hearing, Zoning changes: _____

Celebrating Over 60 Years of Caring for Animals in Need

Chairperson of the Board
Charlene Marchand

December 29, 2015

1st Vice Chairperson
Peter Hogan, C.P.A.

2nd Vice Chairperson
James Carlucci, Esq.

Town of Greenville
P.O. Box 38
Greenville, NY 12083

Treasurer
Scott Shallo, C.P.A., Esq.

Secretary
Gisela Marian

Dear Mr. Macko:

Members
Hollie Adams
Jennifer Donoghue
Robert Gibson, Esq.
Sharyn Richards-Marks

As of this date, we are in receipt of your signed contract and proposed addendum for year 2016.

Past Vice Chair
Hon. Jonathan D. Nichols

Please be advised that CGHS/SPCA cannot accept your proposed addendum as it counters what we will be charging for housing dogs in 2016. Our fee structure is set by the Board of Directors, and is not negotiable.

Volunteer Event Coordinator
Jennifer Newton

We hope you choose to continue to house dogs with CGHS/SPCA in 2016. If so, we will consider the signed contract you sent as an officially signed instrument. Should you have any questions, please feel free to call me at (518) 828-6044 ext. 108, or email me at ronperez@cghs.org.

It's time for Roller-Skating again!

The Town of Greenville has once again sponsored **FREE** skating for students in Greenville at the Cairo-Purling Roller-Rink, Mountain Avenue, Cairo, on the following dates:

Sundays

March 6th, March 13th, March 20th, & April 3rd
between 2pm-5pm

Please bring proof of residency or your report card or school ID with you to show the staff when you enter.

The following release will need to be signed by your parent and handed in the first time you skate!

Memo

To: Paul Macko, Town Supervisor
From: Gordon Bennett, Sole Assessor - (518) 966-4504 ext. 3
CC: Greenville Town Board
Date: January 6, 2016
Re: Solar "farms"

Over the past few weeks I have had conversations with several land owners who have been contacted by solar companies regarding installation of solar "farms" on their properties. The companies are usually looking for a lease period of 20 years on a 20 acre portion of their property with a per acre lease fee of 1000 to 1500 per acre per year. This is a significant income stream for a taxpayer to be eligible for. It has come to my attention that the zoning has no provisions for this type of use and is denied because of that. I would suggest that, in order to allow this kind of opportunity for some Greenville taxpayers, that some allowances or procedures put into place.

Thank you

If further information or action is required, please contact our office.

Gordon Bennett, Sole Assessor

**TOWN OF GREENVILLE
LOCAL LAW # OF 2016
AMENDING ZONING LAW TO CREATE REGULATION AND APPROVAL
STANDARDS FOR SOLAR COLLECTION SYSTEMS**

§ _____

Small-scale solar collector system.

A. Purpose and intent.

(1) The purpose of these regulations is to balance the potential impact on neighbors where solar collectors may be installed near their property while preserving the rights of property owners to install solar collection systems without excess regulation. These regulations are not intended to override the New York State Agriculture and Markets Law.

(2) Solar energy is a renewable and nonpolluting energy resource that can prevent fossil fuel emissions and reduce energy load. Energy generated from solar energy systems can be used to offset energy demand on the grid when excess solar power is generated.

B. Applicability.

(1) The requirements herein shall apply to all solar collector system installations modified or installed after the effective date of this section.

(2) Solar collector system installations for which a valid building permit has been properly issued, or for which installation has commenced before the effective date of this section, shall not be required to meet the requirements of this section, except in accordance with Subsection D, Safety, found herein this section. Any modification, expansion or alteration to an existing solar collector system shall only be permitted in accordance with § 219-39.2 herein.

(3) All solar collector systems shall be designed, erected and installed in accordance with all applicable codes, regulations and industry standards as referenced in the New York State Building Code.

C. Permitting.

(1) Rooftop and flush-mounted solar collectors are permitted in all zoning districts in the Town of Greenville subject to the following conditions:

(a) Building permits shall be required for installation of all rooftop and flush-mounted solar collectors.

(b) Height limitations for structures found in Article IV, Use, Area and Bulk Regulations, shall apply.

(c) Rooftop and flush-mounted solar collector systems are permitted on the following structures:

[1] All principal structures.

[2] All accessory structures that meet the principal structure setbacks as required in each zoning district.

(d) Rooftop units must be three feet from any chimney and shall not be permitted on any roof overhangs.

(e) Any solar collector system attached to a pitched roof shall not extend more than three feet from the surface of the angle of the roof.

(2) Ground-mounted racks and freestanding solar collectors are permitted as an accessory structure in all zoning districts in the Town of Greenville subject to the following conditions:

(a) Building permits shall be required for installation of all ground-mounted and freestanding solar collectors.

(b) A special use permit is required for all ground-mounted racks and freestanding solar collectors in a commercial zoning district, which for purposes of this Zoning chapter shall include the _____ zones.

(c) Special use permit from the Planning Board is required for all ground-mounted racks and freestanding solar collectors greater than 10 feet in height or greater than 20 feet in length or if the solar array surface area is greater than 200 square feet in the aggregate in all residential zoning districts. All other ground-mounted racks and freestanding solar collectors shall follow the standard building permit process.

(d) All ground-mounted racks and freestanding solar collectors shall have a maximum height of 20 feet from ground elevation.

(e) All ground-mounted racks and freestanding solar collectors installed in the side or rear yards shall comply with the setback requirements for a principal structure found in Article III.C. Schedule B, Town of Greenville Dimensional Standards.

(f) Solar collectors may be installed in any front yard but shall not be less than 75 feet from the front property line and shall require a special use permit.

(g) Solar collectors shall be located in a manner that reasonably minimizes shading of adjacent property while still providing adequate solar access for collectors.

D. Safety.

(1) All solar energy systems and solar collectors must obtain a building permit and shall be designed to be and installed to be in conformance with the New York Uniform Fire Prevention and Building Code Standards that are applicable when the building permit is issued.

(2) If solar storage batteries are included, they must be placed in a secure container or enclosure meeting the requirements of the New York State Building Code when in use. When they are no longer in use, they shall be disposed of in accordance with the laws of New York State Fire Prevention and Building Code and local laws of the Town of Greenville and any other applicable laws or regulations.

(3) Glare and heat. No unreasonable glare or heat shall be produced that is perceptible beyond the boundaries of the lot on which such use is situated.

§ _____

Utility-scale solar collector system.

A. Purpose and intent.

(1) The purpose of these regulations is to provide utility-scale solar collector systems through performance criteria that balance the unique characteristics of each site. Utility-scale solar collector systems are only allowed in the _____ zones.

(2) In any instances where specific permitted uses, area, or height standards, development guidelines and/or review procedures specifically set forth in this section conflict with any other general provision or requirements of the Zoning chapter, the particular provisions set forth herein shall take precedence and control.

B. Bulk and area requirements. The following dimensional requirements shall apply to all utility-scale solar collector systems:

(1) Height.

(a) All solar collectors shall have a maximum height of 20 feet from ground elevation.

(b) All buildings and accessory structures associated with the utility-scale solar collector system shall have a maximum height of 35 feet, excluding the solar collector.

(2) Setback. All utility-scale solar collector systems and associated buildings, accessory structures and equipment shall have a minimum setback from any property line of 200 feet.

(3) Lot coverage.

(a) Impervious surface lot coverage. All utility-scale solar collector systems and associated accessory structures and equipment shall utilize a maximum of 20% impervious lot coverage.

(b) Pervious surface lot coverage. All utility-scale solar collector systems and associated accessory structures and equipment shall utilize a minimum of 80% permeable lot coverage.

C. General provisions.

(1) Site plan. All utility-scale solar collector systems shall provide a site plan in accordance with Article IX of this Zoning Law.

(2) Signage. All signage shall be provided as part of site plan review and shall be in accordance with Article V. I. of this Zoning Law.

(3) Visual.

(a) Utility-scale solar collector systems shall be sited in a manner to have the least possible practical visual effect on the environment.

(b) A visual environmental assessment form (Visual EAF), landscaping plan and visual assessment report, including appropriate modeling and photography assessing the visibility from key viewpoints identified in the Visual EAF, existing tree lines, surrounding topography, and proposed elevations shall be required.

(c) Landscaping, screening and/or earth berming shall be provided to minimize the potential visual impacts associated with the utility-scale solar collector systems and its accessory buildings, structures and/or equipment. Additional landscaping, screening and/or earth berming may be required by the Town Board and/or the Planning Board to mitigate visual and aesthetic impacts.

(d) Any associated structure shall be screened, placed underground, depressed, earth bermed or sited below the ridgeline to the greatest extent feasible, particularly in areas of high visibility.

(4) Lighting. A lighting plan shall be required. No utility-scale solar collector system shall be artificially lighted unless otherwise required by a federal, state or local authority. Exterior lighting may be provided for associated accessory structures and access entrances as may be determined appropriate for security purposes only.

(5) Utilities. The applicant shall provide written confirmation that the electric grid has the capacity to support the energy generated from the utility-solar collector system. Electrical and land-based telephone utilities extended to serve the site shall be underground.

(6) Access. The applicant shall indicate on a site plan all existing and proposed access to the site, including road, electric power, emergency access, land-based telephone line connection, and other utilities existing and proposed within the property boundaries of the proposed location. Existing roadways shall be used for access to the site whenever possible and determined acceptable by the Planning Board through site plan review.

(7) Glare and heat. No unreasonable glare or heat shall be produced that is perceptible beyond the boundaries of the lot on which such use is situated.

(8) Ownership. In the case of an application for a utility-scale solar collector system to be located on private lands owned by a party other than the applicant or the Town, a copy of the lease agreement with the property owner shall be filed with the Building Department.

(9) Proof of insurance. The applicant and the owner of the property where the utility-scale solar collector system is to be located shall file with the Building Department proof of insurance in a sufficient dollar amount to cover potential personal and property damage associated with construction and operation thereof.

(10) Security provisions. Each site shall have a minimum of an eight-foot security fence to prevent unauthorized access and vandalism to the utility-scale solar collectors and a security program for the site as approved by the Planning Board during site plan review.

(11) Noise. Noise-producing equipment shall be sited and/or insulated to minimize noise impacts on adjacent properties as approved by the Planning Board during site plan review.

(12) Documentation from the utility company, verifying that the utility-scale solar collector system is active, shall be provided annually to the Town of Greenville Building Department.

(13) Required sureties for construction, maintenance and removal of utility-scaled solar collector systems.

(a) Construction and maintenance. Prior to the issuance of a building permit for the utility-scale solar collector system and any associated accessory structures, the applicant shall post a surety in an amount and form acceptable to the Town for the purposes of construction and maintenance. The amount shall be up to 20% of the

construction value. Acceptable forms shall include, in order of preference: cash; letter of credit; or a bond that cannot expire; or a combination thereof. Such surety will be used to guarantee compliance with the conditions of the approval for the utility-scale solar collector. If the owner of the site fails to comply with any conditions of the approval during construction or as part of the long-term maintenance of the site, all costs of the Town incurred to comply with conditions of the approval shall be paid using the surety provided by the applicant. Failure to comply with the conditions of the approval or to maintain an acceptable level of surety will result in revocation of the certificate of occupancy.

(b) Removal. The utility-scale solar collector system, including any accessory structures and/or equipment, shall be dismantled and removed from the site when the utility-scale solar collector system has been inoperative or abandoned for two years. As a condition of the certificate of compliance, applicants shall post a surety in an amount and form acceptable to the Town for the purposes of removal or abandonment. The amount shall be up to 20% of the construction cost. Acceptable forms shall include, in order of preference: cash; letter of credit; or a bond that cannot expire; or a combination thereof. Such surety will be used to guarantee removal of the utility-scale solar collector system should the system be abandoned. Abandonment shall be assumed by the Town if the annual documentation as required in C. (12) above, is not provided by the owner, applicant or lessee for two consecutive years to the Town of Greenville Building Department. The Town Building Inspector shall then provide written notice to the owner to remove the utility-scale solar collector system, and the owner shall have two years from written notice to remove the utility-scale solar collector system, including any associated accessory structures and/or equipment, and restore the site to a condition approved by the Planning Board. If the owner, applicant or lessee fails to remove any associated structures or restore the site to the condition approved by the Planning Board, all costs of the Town incurred to comply with this condition shall be paid using the surety provided by the applicant.

Subject: Assessing the landfill for a possible Solar project

Date: Sun, Jan 31, 2016 6:11 pm

Hi Paul - hope all is well. As you may recall a few months ago we spoke about EPA conducting a free assessment of your landfill to determine if it was a viable candidate for a solar project.

I may be in the Greenville area this week and am asking for the exact address of the landfill. I can do a short recon to get a sense of the physical layout of the site and then discuss a follow up visit with my coworkers.

So can you please provide the exact address of the site with any cross streets or landmarks to assist in locating the site. I sometimes find that even with an address the sites may be difficult to find.

Also as I previously mentioned EPA has two other programs to assist municipalities. Both are free services:
-thru our brownfields program we can conduct environmental assessments of sites that could be repurpose (for example a gas station). This will provide the municipality with information to determine if there is contamination at the site and the levels.

-thru our emergency response program we can conduct assessments at sites to determine if there are substantial threats to human health or the environment. If a site meets certain criteria, we can then conduct an action to address the contamination.

I'm at 914 606 0103. Thanks

Subject: Fwd: Possible solar project at the landfill

Date: Mon, Feb 1, 2016 12:28 pm

Attachments: Final Beacon Solar Screening Report 5-21-15.pdf (1659K), Solar PV Checklist.docx (31K)

Paul—to followup on y note from yesterday::

To give you a better sense of our work, I am attaching a copy of a solar assessment report EPA completed for the Town of Beacon Landfill. The Town of Beacon is currently exploring options to develop solar Renewable Energy at their landfill.

If there's interest to pursue a solar assessment at your local landfill, EPA will need some basic landfill information from you. See the attached solar checklist.

If you have any questions, feel free to call me [914 606 0103](tel:9146060103) or my coworker Fernando Rosado at [212 637-4346](tel:2126374346).

Thanks

Subject: Municipal Water and Sewer Grant Opportunity

Date: Thu, Feb 4, 2016 5:24 pm

Municipal Water and Sewer Grant Opportunity

The New York State Environmental Facilities Corporation (NYSEFC) has announced Round 2 of the NYS Water Infrastructure Improvement Act grant opportunity.

\$75 million is offered to support grants for water and wastewater projects, with the potential of additional funding for the program that may be set aside in the final State Budget.

The application deadline is April 15, 2016 at 5:00 PM and all complete applications submitted by that date and time will be considered for grant funds.

Delaware Engineering stands ready to apply demonstrated success with Round 1 of the NYS Water Infrastructure Grants to Round 2 projects. The window of opportunity for Round 2 of the NYS Water Infrastructure Grants program is brief; we will actively engage municipalities in evaluating this opportunity for grant funds and encourage communication at info@delawareengineering.com or 518-452-1290.

Wastewater Project Categories:

- Hardship – 2016 IUP Criteria
 - 2013 American Community Survey (ACS) Median Household Income (MHI) must be
 - Less than \$46,402
 - Between \$46,402 and \$58,002 with a family poverty rate of 11.69%
- Combined Sewer Overflow/Sanitary Sewer Overflow (CSO/SSO)
- Resiliency to reduce the impacts of flooding or other natural disasters

Drinking Water Project Examples:

- Transmission and distribution improvements
- Source replacement or augmentation
- Treatment plant improvements
- Pumping and storage improvements

Subject: Fwd: Applications Now Available for \$75M in Grants for Drinking Water and Wastewater Improvements

Date: Wed, Feb 3, 2016 12:51 pm

Paul-

I'm repositioning your filing from last fall for this round. Let's meet on Monday to discuss.

Victor Cornelius
Endeavor Municipal Development, Inc.
518-697-0437

Environmental Facilities Corporation

The New York State Environmental Facilities Corporation (EFC) today announced that applications are now available for \$75 million in water infrastructure grants to assist local governments in advancing their drinking water and wastewater infrastructure projects.

If additional funds are appropriated in the enacted 2016-17 state budget, additional grant funding will be available for this round.

Funds will be administered by EFC and the state Department of Health.

A webinar has been scheduled for February 24 at 10 AM to provide an overview of the grant criteria and application process for this round of funding. To register, please click [here](#).

Complete applications must be submitted to NYSWaterGrants@efc.ny.gov no later than the close of business on **Friday, April 15, 2016**.

For more information and an application, visit www.efc.ny.gov/NYSWaterGrants.

Sincerely,
NYS Environmental Facilities Corporation

Stakeholder Announcement
Federal Planning Assistance for
Broadband and Sustainable Community Development
Cool & Connected

USDA Rural Utilities Service Administrator Brandon McBride encouraged communities interested in using broadband service to help revitalize small-town main streets and promote economic development apply for Cool & Connected, a pilot program sponsored by USDA Rural Utilities Service and the U.S. Environmental Protection Agency Office of Sustainable Communities.

Through Cool & Connected, a team of experts will help community members develop strategies and an action plan for using planned or existing broadband service to promote smart, sustainable community development.

Quality broadband access can provide new opportunities for people and businesses. A growing number of communities have combined broadband service with other local assets such as cultural and recreational amenities to attract and retain investment and people, including young people. This can help diversify local economies. Such efforts typically require planning among community leaders, businesses, and internet service providers. The Cool & Connected program will provide assistance to this end, helping communities take advantage of new or existing broadband service to create walkable, connected, economically vibrant main streets and small-town neighborhoods.

Eligibility

- Any community representative is welcome to submit a letter of interest to participate in Cool & Connected.
- Special consideration will be given to small towns and rural communities that face economic challenges.
- Special consideration will be given to communities in places where USDA has provided loans or grants in support of broadband or other internet-related services.

Deadline and where to send letters of interest

Submit your letter of interest to Ed Fendley at Fendley.Ed@epa.gov by Wednesday, February 24, 2016. Kindly include "Cool & Connected" and the name of your community in your e-mail subject line.

What to include in your letter of interest

Your letter of interest can be in the text of an email or an attachment. It should be no longer than two printed pages. If you want, you can provide additional letters of support from partners, but this is not necessary.

Community representatives are encouraged to describe community needs and challenges related to downtown revitalization or other place-based development, and how a planning process might help. You should indicate any areas of interest related to internet service and place-based development, such as:

- Using new or existing broadband service to attract new types of businesses to main streets or existing rural communities
- Combining internet service with other local amenities to attract new investors, visitors, and residents
- Developing or marketing downtown Wi-Fi zones
- Extending broadband service beyond anchor institutions in ways that promote main street development
- Selecting centrally located anchor institutions or community facilities that will receive broadband service

Community representatives submitting letters of interest are also encouraged to indicate partners that can be expected to participate in a planning process, such as local internet service providers, local officials, business associations, or local schools or colleges.

January 2016

Supervisor Macko and Town Board members Bear, Stern, Bensen, and Davis:

My annual report for 2015 reflects my efforts to further not only my own projects and but also discussions with the public about local history.

A collaboration with the Greenville Local History Group is a vital tool. With the help of the Group's 100+ members, the historian's files have accumulated information that helps preserve our knowledge of Greenville. Monthly meetings, April through November, not only continue to highlight various aspects of our local history but also serve to spread the accomplishments of the various members and continue to encourage "local historians" to continue preserving vital information. This year's topics included:

- "President and Mrs. Lincoln" relating April 1865 to us 150 years later
- slide show - history and houses of O'Hara's Corners with brothers John and Peter O'Hara on hand
- memories of Main Street, Greenville, as related by dozens of residents
- Main Street, Greenville slide show of 160 photographs of different eras
- a portrayal of the Stevens families, as narrated by Sylvia Hasenkopf
- presentation by Beautification Committee for the preservation of the Presbyterian Church
- unveiling of the 2016 calendar (a copy to Supervisor)
- a travelogue of a trip to Italy

Additional topics included: publicizing the Ducks of Greenville, the finding of a barn timber in the Griffin barn signed by Truman Ingalls, drawing attention to the aspects of the Zoning Revision that related to local history interests, and the GLHG's recognition of Mary Heisinger.

I have continued to write a newsletter for the Greenville Local History Group (2015 issues: 241-248), a copy of which is given to you on a regular basis, as are any special publications relating to local history. Mailings are sent to about thirty members, and another one hundred ten technologically connected friends of local history receive this by email. These monthly meetings are also available on my website (<http://www.dteator.com/glhg/glhg.htm>), as are a few other local history topics.

Another major project, usually needing 50-75 hours, is the production of the Greenville Local History Group Calendar. 2016's edition captured a dozen views of old and new Greenville, highlighting the similarities and difference of then and now. In addition, the calendar recognizes the contributions that community members have made to the Greenville area.

The 2017 version is in the early stages of production.

2015 saw a continuation of past projects that continue to further the addition to and the sharing of information of the history of Town of Greenville.

The multi-part photo project—duplicating historic photos, recording local history with current photos, and re-using those we already have for new uses—continues. Sixty albums, both of photos and documents, record town history. These are the basis for the photographic presentations given to town and community groups.

In 2015, this photo archive gained several hundred scans of Greenville scenes and of a variety of Greenville families. In addition, the Xeroxing of documents and scrapbooks will allow seldom seen artifacts to be available to the public.

One project that is quietly working behind the scenes, with the help of two volunteers, is a Greenville Family Tree, using obituaries and newspaper records to enter names into a genealogy database.

Various other projects and duties cover the spectrum of a Historian's duties. In 2015, they included:

- attend to Town Board requests
- respond to about 10 letters
- answer about twenty phone calls
- reply to over seventy emails asking for genealogical and local history information
- continue the collection of business cards of people living in and associated with Greenville
- cross-referencing articles of local historical importance
- collaborated with Mary Lou Nahas at the Greene County Historical Society for a Boarding House program
- conducted a Greenville Cemetery tour for the Greenville Girl Scouts
- gave a local history program for the Greenville-Norton Hill Methodist Women

In closing, I feel 2015 was a productive local history year, made possible with the help of many people. I wish to thank the Greenville Town Board for their active support, as well as interest shown, for my activities. Your continued financial support allows for additions to the records that otherwise might not be possible. In addition, I thank my wife Debra for sharing my local history endeavors, the members of the Greenville Local History Group who have helped me be a better historian, and those individuals belonging to none of the above groups who, through action and encouragement, have proven that Greenville respects its local history.

Respectfully,

A handwritten signature in black ink, appearing to read "Don Feaster". The signature is written in a cursive style with a large, stylized initial "D".
